In conclusion we wish to thank M. D. Galanin and A. M. Leontovich for placing the ruby laser at our disposal.

Tні several errors (one term is missing and several signs are incorrect). The correct expression has the form*

$$
\begin{aligned}
d \sigma= & \frac{\pi r_{0}^{2}}{\gamma^{2}}\left\{F_{1}^{4}\left(q^{2}\right) \frac{1+\cos ^{4}(\vartheta / 2)}{4 \sin ^{4}(\vartheta / 2)}+\frac{F_{1}^{2}\left(q^{2}\right) F_{1}^{2}\left(f^{2}\right)}{2 \sin ^{2}(\vartheta / 2)\left(\cos ^{2}(\vartheta / 2)\right.}\right. \\

In addition, it was erroneously indicated that the experiment with the ultrarelativistic electrons aimed at determining the upper limit $\lambda$ had been suggested by Avakov and Ter-Martirosyan. This was actually done by Margolis, Rosendorff, and Sirlin ${ }^{[1]}$.

I am grateful to A. A. Bogush and I. S. Satsunkevich, whose remark ${ }^{[2]}$ induced me to check the results.
